

Audiovisual Installer/Engineer – Boston Light & Sound

Job Description:

- Highly respected and established AV contracting firm is looking for a full-time lead installer with a minimum of 3 years experience. Must have a technical knowledge and understanding of audio, video and control systems. Must take ownership and responsibility of projects while being supported by an engineering and project management team.
- A pleasant personality, neat appearance and the ability to deal professionally with clients and coworkers is a must.
- Duties to include, but not limited to, rack assembly, audio, video and control terminations, loudspeaker, video projector, flat panel and projection screen mounting as well as DSP programming, audio, video and control testing, system tuning and client instruction.
- A driver's license and the willingness and ability to climb ladders and scaffolding is required. While evening and weekend work is rare, it may be required from time to time.
- Time management, reliability and honesty is expected.

Skills:

- Understanding audio, video and control flow
- Understanding of computer networking
- Control and video distribution
- DSP programming skills
- Test equipment use
- Grounding knowledge
- Familiar with Crestron, AMX and Extron control systems
- Troubleshooting skills
- Soldering and mechanical terminations
- AutoCad and SMAART software experience a plus
- CTS and other industry certification a plus

Benefits:

- Generous paid vacation/sick/personal/holiday time
- 50% employer paid health and dental insurance
- 100% employer paid ST/LT disability and life
- 401K with company match
- FSA Health Savings
- Private office work space

Compensation:

Compensation package is competitive and commensurate with experience.
