

Boston Light & Sound®

# LIVE EVENTS PRODUCTION SERVICES

Boston Light & Sound® is the go-to source for exceptional sound and presentation for marquee events, such as annual meetings, conventions, commencement addresses, private parties, and music festivals. Our agile team can work directly with an organization or event planner to execute their vision for the event, or work hand in hand with a production company.

As experienced project planners, we seamlessly bring together all the equipment and staff for every audiovisual need. We're there from project inception through installation, optimizing, and on-site support throughout the event to ensure everything runs smoothly. Recent projects include:

- Providing sound reinforcement and on-site support during **President Obama's speech at the Cathedral of the Holy Cross**
- Optimizing sound reinforcement and providing technical support for **annual Masses at Boston College**
- Converting a cafeteria into an upscale presentation space with remote and live presentation systems and support for **Sunovion Pharmaceuticals' 1,000-person quarterly meeting**

Our highly trained staff can set up, tune, and operate the very latest **L'Acoustics technology**—providing you with optimal audio coverage in a compact footprint for any venue from ballrooms to arenas. An exceptionally high-end system, L'Acoustics is the ideal choice for those with discerning taste in audio.
